To whom it may concern,

On time Staffing LLC has been a temporary service provider to Cardinal Health since March 2002. Our principal business requirement from On time is the supply of general labor associates for our packaging facility

Having been with Cardinal for a number of years I have used many temporary staffing providers. Our experience with On time Staffing has been the most rewarding both from a relationship and ROI standpoint

Prior to our partnership with On time, our temporary staffing process was fragmented, inefficient, costly and a strain on our HR department. With the addition of their on-site staffing arrangement, On time was able to provide a "single source", cost effective staffing solution. Shortly after our relationship began, On time became our exclusive supplier of temporary associates to our packaging facility.

From a human capital perspective, the pharmaceutical packaging business is tremendously volatile and seasonal. On time has supported Cardinal with the ability to source, supply and manage temporary employee groups as large as 250 on a moments notice

Throughout my relationship with On time Staffing, Brian Kares has been my key point of contact. From inception Mr. Kares and the On time staff have delivered on their promises and Cardinal has experienced a professional relationship with exceptional customer support. During our affiliation we have achieved production efficiencies, output increases and enhanced quality attributable to On time's ability to:

1. manage temp associates (on-site)
2. increase temp associate compliance
3. reduce internal HR/supervisor participation
4. decrease time to fill
5. increase fill ratios
6. increase quality of candidate
7. increase CGMP compliance

Without reservation I recommend the services of On time Staffing, LLC. On time has been there when we needed them and they are consistently exceeding expectation.

Sincerely,

A handwritten signature in black ink that reads "Erin Moore".
